Your success counts

# Flow rate Indicator / Totalizer

with analog and pulse signal outputs

The F-Series is your first and safest choice for field mount indicators in safe and hazardous area applications. Especially in harsh weather conditions like rain, snow, salty atmospheres and temperatures between -40°C up to +80°C (-40°F up to 176°F).

#### **Advantages**

- Robust aluminum or stainless steel 316L field enclosure (IP67 / NEMA Type4X). It is so rugged, a truck can even stand on it!
- Intrinsically Safe available ATEX and IECEx approval for gas and dust applications.
- Programming can be done by your own crew, with the sensible menu-driven structure, saving cost and irritation. Know one, know them all!
- Very diverse mounting possibilities: walls, pipes, panels or directly onto outdoor sensors!

#### **Features**

- Displays instantaneous flow rate, total and accumulated total.
- Large 17mm (0.67") digit selection for flow rate or total.
- Easy configuration with clear alphanumerical display and
- LED backlight option.
- Selectable on-screen engineering units; volumetric or mass.
- Ability to process all types of signals: Sine wave (coil), NAMUR, NPN/PNP pulse, Reed-switch, Active pulse signals, (0)4-20mA.
- Pulse output according to accumulated total.
- Analog (loop powered) output according to flow rate.
- Full Modbus communication RS232/485/TTL.
- Power requirements: Loop or battery powered, 8 30V DC, 8 - 24V AC/DC or 115 - 230V AC.
- Sensor supply: 3 / 8.2 / 12 / 24V DC.
- Auto backup of settings and running totals.

#### Introduction

The F110 is the most popular model in our range of flow rate / totalizers, complete with pulse and analog output signals. Even demanding applications are catered with our base unit configuration. A wide selection of options further enhances the capabilities of this model, including Intrinsic Safety and full Modbus communication

# **Display**

The display has large 17mm (0.67") and 8mm (0.31") digits which can be set to show flow rate and totals. On-screen engineering units are easily configured from a comprehensive menu. The accumulated total can register up to 11 digits and is backed-up in EEPROM memory every minute. For those applications where readability during day and night is an issue, a white backlight is available.

# Configuration

All configuration settings are accessed via a simple operator menu which can be password protected. Each setting is clearly indicated with an alphanumerical description, which avoids confusing abbreviations and baffling codes. Once familiar with one F-series product, you will be able to program all models in the series without a manual. All settings are safely stored in EEPROM memory in the event of sudden power failure.

#### Communication

All process data and settings can be read and modified manually or through the Modbus communication link (RS232 / RS485). Full Modbus functionality remains available for the Intrinsically Safe version (TTL).

# **Pulse output**

The scaleable pulse output, reflects the count on the accumulated display. The pulse width is user defined from 0.001 second up to 9.999 seconds. The maximum output frequency is 500Hz. The output signal can be passive NPN, active PNP or an isolated electro-mechanical relay.

#### **Hazardous areas**

This model is ATEX and IECEx certified as Intrinsically Safe for gas applications with an allowed ambient temperature of -40°C to +70°C (-40°F to +158°F) and dust applications with an allowed ambient temperature of -40°C to +50°C (-40°F to +122°F).

# **Analog output signal**

The flow rate is re-transmitted with the (0)4-20mA or 0 - 10V DC output signal. The output signal is updated eight times per second with a filter function being available to smoothen out the signal if desired. The output value is user defined in relation to the flow rate, e.g. 4mA equals to 15L/Hr and 20mA equals to 2000L/Hr. The output signal can be passive, active or isolated where the passive output type will loop power the F110 as well.

# **Overview application F110**

The F-Series is your first and safest choice for field mount indicators in safe and hazardous area applications. Especially in harsh weather conditions like rain, snow, salty atmospheres and temperatures between -40°C up to +80°C (-40°F up to 176°F). Liquid flow measurement where re-transmission of the flow rate and/or totalizer functions or serial communication is required. Alternative basic models: F010 - F011 - F012 - F014 or more advanced F112 - F113 - F118 or the E-Series explosion proof flow rate indicators.

# Signal input

The F110 accepts most pulse and analog input signals for volumetric flow or mass flow measurement. The input signal type can be selected by the user in the configuration menu without having to adjust any sensitive mechanical dip-switches or jumpers. The analog input is available with linear and square root calculation and even as 4 - 20mA input loop powered.

| Type of signal    | Resistance      | Low Pass filter<br>(LP) | Max. frequency           | Max. frequency<br>Low Pass filter<br>(LP) | Min. amplitude<br>P-P | Remark                  |

#### **Enclosures**

Various types of enclosures can be selected, all ATEX and IECEx approved. The F110 is supplied in an GRP panel mount enclosure as standard, which can be converted to an IP67 / NEMA Type4X GRP field mount enclosure by the addition of a back case. Most popular is our robust aluminum field mount enclosure which is also available with an extended backcover with undrilled preparation for direct meter mounting at the back side. It is so rugged, even a truck can stand on it! For the most challenging environments we have a durable high grade Stainless steel 316L enclosure. All enclosures have a IP67 / NEMA Type4X rating and EU or U.S. cable gland entry threads available.

#### Configuration example F110-P-AP-CH-IB-OT-(PX)-XX-ZX

For pulse type inputs:  $V_{nef}$ : 1.2V/3.0V available.- NO power output, available  $I_{supply}$ : <1mA. Note: using these ref. voltages at max. load, will reduce battery life significantly.

#### Configuration example F110-A-AI-CI-IB-OR-PM-XX-ZX

<sup>\*</sup> Supply voltage: 3 / 8.2 / 12 / 24V DC to sensor

# **Hazardous area applications**

The F110-XI has been certified according to ATEX and IECEx by DEKRA for use in Intrinsically Safe applications with an ambient temperature of -40°C to +70°C (-40°F to +158°F).

For equipment category Dust, zone 20 (1 D / EPL Da), the maximum ambient temperature is limited to  $50^{\circ}$ C (+122°F) and a maximum dust layer thickness of 200mm.

• The ATEX markings for gas and dust applications are:

Gas: II 1 G Ex ia IIB/IIC T4 Ga.

Dust: II 1 D Ex ia IIIC T<sub>200</sub> 100 °C Da.

• The IECEx markings for gas and dust applications are:

Gas: Ex ia IIC/IIB T4 Ga. Dust: Ex ia IIIC  $T_{200}$  100 °C Da.

Besides the I.S. power supply for the pulse output, it is allowed to connect up to three I.S. power supplies in IIB/IIIC applications or one in IIC applications. Consult the certificate for the maximum input and output values of the circuits. Full functionality of the F110 remains available, including 4 - 20mA output, pulse output and Modbus communication (type CT). Power supply type PD-XI offers a 8.2V sensor supply e.g. for one Namur sensor. An ATEX approved flame proof Ex d enclosure is available as well. Please contact your supplier for further details.

# **Signal inputs - Flowmeter**

| Ciginal imparts |  |
|-----------------|--|
| Type P          | Coil / sine wave (HI: 20mVpp or LO: 80mVpp -               |
|                 | sensitivity selectable), NPN/PNP, open collector,          |
|                 | reed switch, Namur, active pulse signals 8 - 12            |
|                 | and 24V DC.  |
| Frequency       | Minimum 0Hz - maximum 6kHz for total and                   |
|                 | flow rate. Maximum frequency depends on signal             |
|                 | type and internal low-pass filter. E.g. reed switch        |
|                 | with low-pass filter: max. frequency 120Hz.                |
| K-Factor        | 0.000010 - 9,999,999 with variable decimal                 |
|                 | position.  |
| Low-pass filter | Available for all pulse signals.                           |
| Option ZF       | coil sensitivity 10mVpp.                                   |
| Туре А          | (0)4 - 20mA. Analog input signal can be scaled             |
|                 | to any desired range within 0 - 20mA.                      |
| Type U          | 0 - 10V DC. Contact factory.                               |
| Accuracy        | Resolution: 14 bit. Error $< 0.025$ mA $/ \pm 0.125$ % FS. |
|                 | Low level cut-off programmable.                            |
| Span            | 0.000010 - 9,999,999 with variable decimal                 |
|                 | position.  |
| Update time     | Four times per second.                                     |
| Voltage drop    | Type A: 2.5V @ 2omA.                                       |
| Relationship    | Linear and square root calculation.                        |
| Note A          | For signal type A: external power to sensor is             |
|                 | required; e.g. type PD.                                    |
|                 |  |

# Signal inputs - Additional input

| Signal inputs - Additional input |  |
|----------------------------------|--|
| Function                         | Terminal input to reset total remotely.                |
|                                  | • If this terminal input is closed, the "clear total"- |
|                                  | function is disabled.                                  |
| Type IB                          | Internally pulled-up switch contact - NPN.             |
| Duration                         | Minimum pulse duration 100msec.                        |

# Signal outputs - Digital output

| Function  | Pulse output - transmitting accumulated total.  |
|-----------|---|
| Frequency | Max. 500Hz. Pulse width user definable between  |
|           | 0.001 second up to 9.999 seconds.               |
| Type OA   | One active 24V DC transistor output (PNP); max. |
|           | 50mA per output (requires -PD, PF, PM or PX).   |
|           | Requires min. 24V power supply                  |
| Type OR   | One electro-mechanical relay output - isolated; |
|           | max. switch power 230V AC (N.O.) - 0.5A per     |
|           | relay (requires PF or PM).                      |
| Type OT   | One passive transistor output (NPN) - not       |
|           | isolated. Max. 50V DC - 300mA per output.       |

# Signal outputs - Analog output

| Function           | Transmitting flow rate.                             |
|--------------------|---|
| Accuracy           | 10 bit. Error < 0.05%. Analog output signal can     |
|                    | be scaled to any desired range.                     |
| <b>Update time</b> | Eight times per second.                             |
| Type AA            | Active 4 - 20mA output (requires PD, PF, PM or PX). |
| Type AB            | Active 0 - 20mA output (requires PD, PF, PM or PX). |
| Type AF            | Passive floating 4 - 20mA output for                |
|                    | Intrinsically Safe applications (requires XI + PD). |
| Type AI            | Passive galvanically isolated 4 - 20mA output -     |
|                    | also available for battery powered models.          |
| Type AP            | Passive 4 - 20mA output - not isolated. Unit will   |
|                    | be loop powered.                                    |
| Type AU            | Active 0 - 10V DC output (requires PD, PF, PM or    |
|                    | PX). Requires min. 12V power supply.                |

# **Signal outputs - Communication option**

| Function   | Reading display information, reading / writing all |
|------------|--|
|            | configuration settings.                            |
| Protocol   | Modbus ASCII / RTU.                                |
| Speed      | 1200 - 2400 - 4800 - 9600 baud.                    |
| Addressing | Maximum 255 addresses.                             |
| Туре СВ    | RS232  |
| Туре СН    | RS485 2-wire                                       |
| Type CI    | RS485 4-wire                                       |
| Type CT    | TTL Intrinsically Safe.                            |

# **Power requirements**

| i ower require |  |
|----------------|--|
| Type AP        | Analog output loop powered, 8 - 30V DC.          |
|                | Power consumption max 0.5 Watt.                  |
| Type PB        | Long life Lithium battery - life-time depends    |
|                | upon settings and configuration - up to 5 years. |
|                | (requires PD, PL or PX)                          |
| Type PC        | Intrinsically Safe long life lithium battery     |
|                | life-time depends upon settings and              |
|                | configuration - up to 5 years.                   |
|                | (requires XI and PD, PL or PX)                   |
| Type PD        | 8 - 24V AC / DC ± 10%. Power consumption         |
|                | max. 5W. Intrinsically Safe: 16 - 30V DC; power  |
|                | consumption max. 1 W.                            |
| Type PF        | 24V AC / DC ± 10%. Power consumption max. 15W.   |
| Type PL        | Input loop powered from sensor signal 4 - 20mA   |
|                | (type "A") - requires types AI and OT (not Xi).  |
| Type PM        | 115 - 230V AC ± 10%. Power consumption max. 15W. |
| Type PX        | 8 - 30V DC. Power consumption max. 0.75W.        |
| Type ZB        | 12 - 30V DC ± 10%. Power consumption max. 1.5W.  |
| Note PB/PF/PM  | Not available Intrinsically Safe.                |
| Note PF/PM     | The total consumption of the sensors and         |
|                | outputs may not exceed 400mA @ 24V.              |
| Note XI        | For Intrinsically Safe applications, consult the |
|                | safety values in the certificate.                |
|                |  |

# **Sensor excitation**

| SCHOOL CACITO | ition   |
|---------------|---|
| Type PB/PC/PX | 3V DC for pulse signals and 1.2V DC for coil pick-up.           |
| Note PB/PC/PX | This is not a real sensor supply. Only suitable for             |
|               | sensors with a very low power consumption like                  |
|               | coils (sine wave) and reed-switches.                            |
| Type PD       | 1.2 / 3 / 8.2 / 12 / 24V DC - max. 50mA @                       |
|               | 24V DC. U <sub>max</sub> sensor is 2V below U <sub>supply</sub> |
| Type PD-XI    | 1.2 / 3 / 8.2V DC - max. 7mA @ 8.2V DC and                      |
|               | mains power supply voltage (as connected to                     |
|               | terminal 1).  |
| Note PD-XI    | In case PD-XI and signal A: the sensor supply                   |
|               | voltage is according to the power supply voltage                |
|               | connected to terminal 1. Also terminal 2 offers                 |
|               | the same voltage.   |
| Type PF / PM  | 1.2 / 3 / 8.2 / 12 / 24V DC - max. 400mA @ 24V DC.              |
|               |   |

# **Operator functions**

| Displayed info | <ul> <li>Flow rate and / or total</li> </ul>                   |

|                | CLEAR-key twice.   |

#### **Total**

| Digits   | 7 digits.                                |
|----------|--|
| Units    | L, m³, GAL, USGAL, kg, lb, bbl, no unit. |
| Decimals | 0 - 1 - 2 or 3.                          |
| Note     | Total can be reset to zero.              |

# **Accumulated total**

| Digits           | 11 digits.                        |
|------------------|-----------------------------------|
| Units / decimals | According to selection for total. |
| Note             | Can not be reset to zero.         |

#### Flow rate

| i ion iacc |   |
|------------|---|
| Digits     | 7 digits.   |
| Units      | mL, L, m³, Gallons, kg, Ton, lb, bl, cf, RND, ft³, scf, |
|            | Nm³, NI, igal - no units.                               |
| Decimals   | 0 - 1 - 2 or 3.   |
| Time units | /sec - /min - /hr - /day.                               |

# **Mounting accessories**

| Stainless steel wall mounting kit.             |
|--|
| Stainless steel pipe mounting kit              |
| (worm gear clamps not included).               |
| Two stainless steel worm gear clamps           |
| Ø 44 - 56mm.                                   |
| Two stainless steel worm gear clamps           |
| Ø 58 - 75mm.                                   |
| Two stainless steel worm gear clamps           |
| Ø 77 - 95mm.                                   |
| Two stainless steel worm gear clamps           |
| Ø 106 - 138mm.                                 |
| Swivel with 25° movement from center axis for  |
| direct flowmeter mounting: 1" NPT to 1/2" NPT. |
|  |

# **Intrinsically Safe isolators**

| member | intrinisically sale isolators                  |  |
|--------|--|--|
| ACG01  | MTL5511 - One channel pulse or switch output   |  |
|        | transfer from hazardous area to safe area.     |  |
| ACG02  | MTL5525 - One channel power supply from        |  |
|        | safe area to hazardous area (e.g. to power the |  |
|        | unit with PD or to power a switching or analog |  |
|        | device in hazardous area).                     |  |
| ACG03  | MTL5541 - One channel 4 - 20mA repeater from   |  |
|        | hazardous area to safe area.                   |  |
| ACG04  | MTL 5051 - Bi-direction serial-data-isolator   |  |
|        | (for Modbus communication).                    |  |
| ACG05  | MTL5516C - Two channel pulse or switch output  |  |
|        | transfer from hazardous area to safe area.     |  |
| ACG06  | MTL5513 - One channel pulse or switch output   |  |
|        | transfer from hazardous area to safe area.     |  |
| ACG07  | MTL5546Y - One channel isolated driver         |  |
|        | bringing 4 - 20mA from safe area to hazardous  |  |
|        | area, HART transparent, OCD.                   |  |

|                   |          | Description  |
|-------------------|----------|--|
| Model             | F110     | Flow rate indicator / totalizer with analog and pulse signal outputs.  |
| Innut             | А        | (0)4 - 20mA input.   |
| Input             | Р        | Pulse input, e.g., coil, npn, pnp, namur, reed-switch.   |
| Analog output     | AA       | Active 4 - 20mA output - requires XX and PD, PF, PM or PX.   |
|                   | AB       | Active 0 - 20mA output - requires XX and PD, PF, PM or PX.   |
|                   | AF       | I.S. floating 4 - 20mA output - requires XI + PC or PD.  |
|                   | Al       | Isolated 4 - 20 mA output - requires XX.   |
|                   | AP       | Passive 4 - 20mA output, loop powered unit.  |
|                   | AU       | Active 0 - 10V DC output - requires XX and PD, PF, PM or PX.   |

|                   | PL       | Input loop powered from sensor signal type "A" - requires XX, AI and OT.   |
|                   | PM       | 115 - 230V AC + sensor supply - requires XX.   |
|                   | PX       | Basic power supply 8 - 30V DC.  Additional lithium battery powered (optional) - requires XX and PD or PX.  Additional lithium battery powered (optional) - Intrinsically safe - requires XI, and PD or PX.   |
| Battery           | PB       | Additional lithium battery powered (optional) - requires XX and PD or PX.  |
| Hazardous         | PC       | Additional lithium battery powered (optional) - Intrinsically safe - requires XI, and PD or PX.  |
|                   | XI       | Intrinsically safe, according ATEX and IECEx.  |
|                   | XF       | Ex d enclosure - 3 keys according ATEX and IECEx.  |
| I                 | XX<br>ZD | Intrinsically safe, according ATEX and IECEx.  Ex d enclosure - 3 keys according ATEX and IECEx.  Safe area only.  Backlight - requires XX.  Coil input 10mVpp.  |
| Options           | ZB<br>ZF | Backlight - requires XX.  Coil input 10mVpp.   |
|                   | ZX       | No options.  |
|                   | 21       | No options.  |
