

Flow-Teknikk AS

Metal tube flowmeters Series SC250

Variable area flowmeter for liquids, gases and steam

- Metallic or plastic tube with a robust construction
- Indication by means of magnetic coupling
- Scales calibrated in l/h, m³/h, kg/h, t/h, %, etc.
- High performance measurement in extreme working conditions and high resistance to corrosion
- Low pressure drop
- Fully hygienic design available
- Damping mechanism to avoid float bounces in gas and steam applications
- Flow measurement in horizontal pipes with the model SC250H and in vertical pipes with downwards or upwards flow (to increase the flow capacity) with the model SC250V
- Flow rate (model SC250):
 - Water: 2.5 l/h ... 180 m³/h
 - Air: 75 NI/h ... 5400 Nm³/h
- Accuracy: 2.5% (q_G=50%) / 1.6% (q_G=50%) on request
- Connections:
 - Model SC250: DN15 ... DN150
 - Models SC250H ... V / SM250: DN15 ... DN80
 - EN 1092-1 or ANSI flanges. Other flange standards on request (JIS,...)
 - Threaded connections BSP or NPT
 - Sanitary connections according to ISO 2852, SMS 1145, DIN 11851, TRI-CLAMP®
- Materials: EN 1.4404 (AISI 316L), PVC, PP, PTFE, Titanium, Hastelloy
- Local indication
- Options:
 - 1 or 2 limit switches
 - Electronic transmitter with 4-20 mA analog output for safe or hazardous area (Ex ia IIC T4 or T6 protection, ATEX certified). HART protocol available on request
 - Local volume totalizer. Remote volume totalizer by means of pulse output (not available for Ex transmitters)

Working principle

Flowmeters based in the variable area principle. audalímetros basados en el principio de área variable. The metering system consists on a calibrated orifice and a conical float. The force from the fluid, as it flows from the bottom to the top, displaces the float until it reaches an equilibrium point that is a function of:

- E = force of the fluid flow
 - Pf = weight of the float
 - Al = free area of flow
- (Al = Ao, calibrated orifice area, - Af, float area)

Each float position represents an area between the float and the orifice. This area corresponds to a flow rate.

Ao= calibrated orifice area
Af= float area
Pf= weight of the float
E= force of the fluid flow
Al= Ao-Af= free area of flow

Applications

- Water treatment plants, pulp & paper and food industry
- Pharmaceutical, chemical and petrochemical industry
- Power plants and nuclear generating plants
- Heating and cooling circuits
- Saturated steam circuits
- Oven treatments and control of gas burners

Models

- SC250 upwards flow direction
- SC250H horizontal flow direction
- SC250V downwards flow direction or upwards flow direction with increased flow capacity
- SM250 for fluids with high viscosity

Model SC250

Technical data

- **Accuracy**, acc. to VDI/VDE 3513 sheet 2 ($q_G=50\%$):
2.5% / 1.6% on request
- **Direct scales in engineering units or in %**
- **Scale range:** 10:1
- **Fluid density:** no restrictions
- **Fluid viscosity:** up to 10 mPa·s approx., depending on flow rate

• Fluid temperature:

- EN 1.4404 (AISI 316L): -50°C ... +300°C
For higher temperatures, see thermal separator p. 11
- PTFE: -20°C ... +150°C
- PVC: 0°C ... +50°C
- PP: -5°C ... +90°C

• Ambient temperature:

- EN 1.4404 (AISI 316L) & PTFE: -20°C ... +80°C
- PVC: 0°C ... +45°C
- PP: -50°C ... +80°C

• Working pressure:

- SC250 / INOX (EN 1.4404 - AISI 316L):
PN40 DN15 ... DN50
PN16 DN65 ... DN150
Others on request
- SC250 / PVC / PP / PTFE
(AISI 316L tube, PVC / PP / PTFE lined):
PN40 DN15 ... DN40
PN16 DN50 ... DN125
PN10 DN150
Others on request
- SC250 / PVC T / PP T (Fully PVC / Fully PP): PN16

• Connections:

- DN15 ... DN150 EN 1092-1 flange or ANSI equivalent. Other flange standards on request (JIS,...)
- Threaded connections BSP or NPT
- Sanitary connections according to ISO 2852, SMS 1145, DIN 11851, TRI-CLAMP®.
Fully hygienic design available on request

- **Housing:** IP65 - coated aluminium. IP65 - PP or IP67 - EN 1.4404 (AISI 316L) with glass window, on request

Operation

- **Vertical with upwards flow (BD)**

Limit switches and transmitters

- **SC-AMM1 ... 2:** 1 or 2 adjustable micro-switches
- **SC-AMD1 ... 2:** 1 or 2 adjustable inductive detectors
(+ relays on request)
- **TH7 ... TH7H:** 4-20 mA transmitter 2 wires + pulse output. HART protocol with model TH7H
- **TH7T ... TH7TH:** 4-20 mA transmitter + totalizer 2 wires + pulse output. HART protocol with model TH7TH
- **TH7 Ex ... TH7H Ex:** 4-20 mA transmitter 2 wires Ex ia IIC T4 or T6 (ATEX). HART protocol with model TH7H Ex
- **TH7T Ex ... TH7TH Ex:** 4-20 mA transmitter + totalizer 2 wires Ex ia IIC T4 or T6 (ATEX). HART protocol with model TH7TH Ex

Float types

DN15 ... DN80

DN100 ... DN150

The tapered floats are constructed in AISI 316L, PVC, PP and PTFE as standard or other materials on request, according to the characteristics of the process fluid.

The maximum working viscosity for these floats is 10 mPa·s approx., depending on flow rate.

Flow-Teknik AS

Models SC250H ... V

The SC250H...V are versions of the SC250 flowmeter that can be installed in horizontal pipes with flow from left to right or right to left, in vertical pipes with downwards flow or in vertical pipes with upwards flow to increase the standard flow capacity.

Working principle

The metering system is made up of a calibrated orifice, a conical float and a spring.

The force from the fluid, as it flows through the flowmeter, displaces the float and compresses the spring, reaching an equilibrium point which corresponds to a specific flow.

Technical data

The accuracy is 2.5% ($q_G=50\%$) or optionally 1.6% ($q_G=50\%$) according to VDI / VDE 3513 sheet 2.

The SC250H...V is suitable for the flow measurement of liquids or gases and can be equipped with additional switches, transmitters and options like the SC250 series.

The standard materials for the floats are PVC, PP, PTFE and EN 1.4404 (AISI 316L). Versions for high pressure and temperature applications are also available.

For more details about pressure and temperature limits, materials, etc. please refer to model SC250.

Operation

- **Vertical, with SC250V:**
 - Upwards flow (BD)
 - Downwards flow (DAB)
- **Horizontal, with SC250H:**
 - Left to right flow (ED)
 - Right to left flow (DES)

⁽¹⁾ Flow ranges available only with plastic float (PP / PVC / PTFE)

Other flow ranges available, with different float materials

Scales for air, liquids or gases available

Model SM250

The SM250 is a version of the SC250 flowmeter that is suitable for liquids with high viscosities, which cannot be measured with the standard SC250. This is achieved thanks to its internal design and special floats.

Working principle

The metering system consists of a conical tube and a special T or V float. In this model, there is no calibrated orifice inside the tube. The force from the fluid, as it flows from the bottom to the top, displaces the float until it reaches an equilibrium point.

Technical data

The standard accuracy is 1.6% ($q_G=50\%$).

This model can be equipped with the same electronic devices and accessories as the model SC250. The standard material is EN 1.4404 (AISI 316L) for both the flow tube and the float. Plastic versions (PP, PVC, PTFE) and special instruments for high pressure and temperature applications are also available on request.

For more details about pressure and temperature limits, materials, etc. please refer to model SC250.

Operation

- Vertical with upwards flow (BD)

Float types

The constant section T & V floats are constructed in AISI 316L, PVC, PP & PTFE as standard or other materials on request, according to the characteristics of the process fluid.

Limit switches

Adjustable limit switch SC-AMM

Electrical micro-switch mounted in the indicator housing.

- SC-AMM1 ... 2: 1 ... 2 adjustable limit switches
- Ratings: 3(1) A, 250 V (VDE/CEE)
- Hysteresis: $\pm 10\%$ of full scale value
- Ambient temperature: -25°C ... $+80^{\circ}\text{C}$
- Mechanical life: 10^7 operations
- ATEX certificate Ex ia IIC T6

Gold plated contacts on request.

SC-AMM

Adjustable limit switch SC-AMD

NAMUR (EN 60947-5-6) 3.5 mm slot type inductive detector activated by vane, mounted in the indicator housing.

- SC-AMD1 ... 2: 1 ... 2 adjustable limit switches
- Power supply: 8 VDC
- Ambient temperature: -25°C ... $+70^{\circ}\text{C}$
- ATEX certificate Ex ia IIC T6

Control relay (on request)

NAMUR (EN 60947-5-6) for 1 or 2 inductive detectors.

- Power supply: 24 ... 253 VAC 50-60 Hz
24 ... 300 VDC
- Input: NAMUR Ex ia IIC
- Output: 1 or 2 relay contacts
- Output rating: 2 A 250 VAC 100 VA / 1 A 24 VDC
- Ambient temperature: -20°C ... $+60^{\circ}\text{C}$

SC-AMD

Modular housing

Transmitters and totalizers

Transmitter TH7

The TH7 electronic transmitters provide an analog output proportional to the flow rate and a digital output selectable either as a pulse or an alarm output (except for the Ex versions). They can also include a display for volume totalization. They are based on the Hall effect and mounted inside the indicator housing.

- TH7 transmitter
- TH7H transmitter + HART protocol
- TH7T transmitter + totalizer
- TH7TH transmitter + totalizer + HART protocol

Technical data

- Power supply: 12 ... 36 VDC, 2-wire system
- Power consumption: 4-20 mA for 0 ... 100% of scale
- 4-20 mA analog output:
 - Error: < 0.6% of the magnet position
 - Maximum load in 4-20 mA loop: 1.1 k Ω (with 36 VDC power supply)
- Digital output: Potential free N channel MOSFET, I_{max} 200 mA, for either pulse or alarm output:
 - Pulse output:
 - Max. frequency 6 Hz
 - Pulse duration approx. 62.5 ms
 - Alarm output, adjustable in one point of the scale. Programmable by means of Winsmeter TH7 software
- Totalizer: 8 digits, 4.5 mm high
Reset by potential free contact
- Ambient temperature: -5°C ... +70°C
- Easy programmable by means of Tecfluid's Winsmeter TH7 software, available for download at www.tecfluid.com

ATEX version (Ex ia IIC T4 or T6)

Technical data

- ATEX certificate Ex II 1 GD
- Power supply: 14 ... 30 VDC, 2-wire system
- Power consumption: 4-20 mA for 0 ... 100% of scale
- 4-20 mA analog output:
 - Error: <0.6% of the magnet position
 - Maximum load in 4-20 mA loop: 900 Ω (with 30 VDC power supply)
- Totalizer: 8 digits, 4.5 mm high
Reset by potential free contact
- Ambient temperature: -5°C ... +40°C

TH7

TH7T

TH7T Ex

Both limit switches AMM or AMD and electronic transmitters TH7 or TH7T can be mounted together in the same housing. The TH7 Ex and TH7T Ex transmitters belong to group II. They are intended for use in potentially explosive atmospheres, except in mining

Accessories

Thermal separator

DN	15	25	40	50	65	80	100	125	150
A	177	183	187	194	198	207	216	228	241

- Standard in aluminium, optional in EN 1.4404 (AISI 316L)
- For working with fluids at high and low temperatures
- With electronics

DN15 ... DN65:	-180°C ... +300°C
DN80 ... DN150:	-180°C ... +260°C
- Without electronics: DN15 ... DN150: -180°C ... +400°C
- Reference ambient temperature: 20°C

Explosion proof enclosure Ex d IIC T6

DN	15	25	40	50	65	80	100	125	150
A	195	201	205	212	216	224	234	246	260

- Porthole with glass for viewing the flow rate
- In the inside, the SC250 ... SM250 housing with standard limit switches and transmitters
- Explosion proof protection: Ex d IIC T6
- Ingress protection: IP65
(Pending of certification)

Stainless steel housing

DN	15	25	40	50	65	80	100	125	150
L1	30	30	30	30	30	30	35	35	60
L2	40	40	40	40	40	40	35	35	60
A	115	121	125	132	137	145	154	167	180

- Specially indicated for working within sanitary or sterile installations, saline atmospheres (marine platforms), etc.
- All stainless steel construction EN 1.4404 (AISI 316L), with glass window
- Can fit standard limit switches and TH transmitters
- Ingress protection: IP67

Flow-Teknikk AS

Float damping system (for gas and steam applications)

Ceramic, PEEK or metallic piston system for avoiding float oscillations in flowmeters for gas and steam service, obtaining stable readings even with very low working pressures and low gas densities.

Available for DN15 ... DN80

1. Upper float stop
2. Float
3. Piston
4. Piston locking circlip
5. Guide cylinder
6. Circlips for locking upper float stop & guide cylinder

Heating-cooling chamber

For installations that require maintaining the process fluid temperature by means of the circulation of a heating or cooling fluid through the double chamber of the flowmeter.

- Without contact with the process fluid
- Flanged or threaded pipe fittings (BSP, NPT, EN 1092-1)
Other standards on request
- Pipe fitting diameters according to the table below
- Stainless steel EN 1.4404 (AISI 316L)
Other materials on request

DN	15 (PC)	15	25	40	50	65	80	100	125	150
R	½"		¾"			1"				
B*	DN15			DN20			DN25			
DR	35	39	45	50	50	56	70	80	91	104
DB	77	77	88	105	112	122	130	140	155	172

* EN 1092-1 PN16 flange (others on request)
